November 2017

## Here come the holidays!

Raise your hand if you like us can't believe that the year-end holidays are just around the corner! What happened to this year? It seemed to have flown by very fast!!!

With the warm weather here to stay for the next few months, I'm sure that you too are experiencing the onslaught of flies and bugs!

Flies are pests that just love to chew on our pets' ears. Luckily we have a product for just that purpose. FLY-AWAY comes in a spray and a balm version.

FLYAWAY is a 100% natural full spectrum pest repellent using only the purest essential oils and was formulated by our own veterinarian expert, Dr. Karen Bohme.

FLYAWAY has been specifically formulated to be a safe, highly effective, natural insect repellent, that not only smells pleasant but also contributes to the healthy skin and coat of our pets.

FLYAWAY contains Eucalyptus, Bergamot and Cape Snowbush and is safe to use on dogs and horses.

We recommend treating pets 2 to 3 times per day for the first week, and thereafter once daily. This allows a protective barrier of repellent to form directly on the skin. FLYAWAY nourishes the skin and coat plus aids in the repair of minor wounds due to the healing properties of the essential oils.

We also recommend that if you are located in an agricultural area as we are, that you consider formulating a fly-control programme. SUPER EM, has been a lifesaver for us, so let us know if you are experiencing fly control problems and we can help you with what has worked for us.

Now that we have the fly situation under control, let's talk about the Holiday Season.

Every year I am totally stumped as to what to buy for friends and family. When you have been around as long as I have, you kind of run out of fresh ideas.

So why not give a gift that is actually useful? This year, PROMIX is offering gift vouchers in denominations of R100, R200 and R500. These vouchers are

redeemable for any items in the PROMIX range of "natural" animal products. For those of you not familiar with our range, take a quick tour of our website, and for a complete overview, save yourself some time and view our product video that has everything explained in a fun and light-hearted format.

We deliver nationally, so you can give a voucher to anyone who loves their animals as much as we love ours!

Not only will you be giving a uniquely different gift, but we promise that your furry friends will appreciate it, and pet owners will see a visible difference in their animals' overall health within days!

Vouchers are not product specific, so the person receiving the vouchers is able to purchase anything in the range, addressing any specific requirement that they may have. We are only a phone call away from giving you advice in choosing the correct product for your friends' animals.

**DID YOU KNOW?**

This is animal allergy season. A time of the year when your pet is most likely to experience seasonal allergies. ITCH EASE can greatly aid in reducing symptoms, such as scratching and dry coat, sometimes allergies can also show up as a greasy coat. Sneezing and ear infections are often allergy related symptoms as well.

Omega-3 has very strong anti-inflammatory agents and they are the key building blocks to a healthy healing response in animals. Dogs do not get enough Omega-3 in their diet and that is why they need to be supplemented. When you are looking for an omega supplement for your dog, Omega-3 fatty acids should be your main focus. ITCH EASE contains 9 times more Omega-3 fatty acids than Omega-6, which is the correct ratio required for optimal health. Omega-3 is called "brain food" not only making them smarter, but assists in joint maintenance and overall immunity booster.

ITCH EASE is cost effective— R150 per month for an average 20kg dog.
