PROMIX NEWS

October 2017

COLIC AIN'T NO JOKE!

As the seasons change, our equine darlings become more prone to colic.

Horse colic is the number one horse killer! Once you detect colic, it often results in a costly vet call out.

For some reason, gorgeous new green grass can bring on some colics, and with the added stress of competition in some horses, can also be a contributing factor.

Unfortunately not all colics can be prevented, but you can severely decrease them by applying proper and consistent management with the following basic rules:

- Make sure your horse always has fresh water at hand throughout the day.

- Regular exercise is important.
- Obtain the correct balance between roughage and concentrates in the food.
- Never make any sudden changes in your horse's diet, but rather transition gradually one factor at a time.
- Regular de-worming and dental care is essential.

EM PROBIOTICS are a cost effective and efficient way of preventing colic by up to 80%.

EM PROBIOTICS is a naturally fermented liquid probiotic, utilizing 16 "LIVE" effective micro organisms. EM technology is superior to regular probiotics, which are typically lactic-

acid bacteria in high dosages. EM comprises of an entire consortium of microbes that animals should have. Just 20ml per day, poured directly over the feed will improve food utilization by up to 27%. Probiotics also maximises the immune system and peaks digestion and absorption functions.

Did you know that EM Probiotics has a 2 year shelf life (unopened) and a 70 day shelf life once opened?

EM Probiotics are available in 500ml, 1ltr and 5ltr options. We also have a human probiotic.

A BUGGY SPRING: Due to the mild winter, our horses are at higher risk for AHS and fly infestations. PROMIX has a great vet-formulated product which in clinical testing has proven to reduce the risk of midges by up to 80%. Applied regularly, FLYAWAY, an all natural product, contributes to a healthy skin and coat and is pesticide free. FLYAWAY Spray has been specifically formulated to be a safe, but highly effective insect repellent.

FLYAWAY is safe to use on horses and dogs and contains Eucalyptus, Bergamot and Cape Snowbush, Available in a spray and balm for easy application.

As our economy becomes more and more uncertain, it is up to us as horse owners to try and keep our horses in top condition whilst still maintaining a budget. PROMIX has a full range of equine supplements that will offer your horse the best nutritional support that won't break the bank!

EQUINE MULTI VITAMIN & MINERALS—EQUINE AMINO ACIDS—FIXAWAYBALM—FLYAWAY SPRAY and BALM
